Name

Imagine a World Without Computers.

Imagine a world without computers.

For some reason all the computers in the world stopped working one day at 6:00 in the morning on Monday, May 18, 2020.

First make a list of 5 devices that would no longer work. (Hint: small computers are found in many items.)

For each item that you listed, explain how we would have to do the tasks they normally do without them.

EXAMPLE:

1. Calculator: We would have to use pencil and paper to do our computations. ☹
2. Smart Board: I would have to write / draw on a white board. To show movies, I would have to use an old-fashioned tube-based TV. ☹
