

WATSON INSTITUTE EDUCATION CENTER

Through our focus on outcome-based programs, the Watson Institute provides comprehensive special education and supportive services for children with disabilities from age 3 to 21. The Watson Institute Education Center provides an environment in which children with disabilities can learn, adapt and achieve their fullest potential. Our staff has an unsurpassed passion for their students as they work diligently to find the right approach and technique uniquely tailored to address a child's needs.

KEY PROGRAM BENEFITS:

Educational Expertise

- Watson employs outcome-driven, structured teaching in specialized classrooms that adapt to the needs of our students. Proven, evidence-based practices, such as Applied Behavior Analysis (ABA), which support skill acquisition in areas such as communication, social skills and pre-vocational tasks create an optimal environment for our students.
- Watson's years of experience in providing educational services has produced exceptional outcomes and encouraged life changes for children facing the challenges of Autism Spectrum Disorder, as well as neurological impairments.

Comprehensive Supports

- Watson's onsite specialists support a student's Individualized Education Plan (IEP) as needed in the areas of: speech & language, occupational and physical therapy, behavioral and vision support, social work and nursing.

Convenient Locations

- Bridgeville
- Sewickley

Preparing Students for Transition to Adulthood

- Watson's transition services help our students to develop the necessary skills and confidence to navigate in the community, achieving their greatest potential.

"Your staff teaches from their hearts and have a positive expectation for student's success. Our district is grateful to be able to work with you and know that our families' children are in wonderful hands."
