

# Match the action to the natural consequence!

If I'm super loud in class and bang my desk and scream...

I'm going to get wet

If I hit my friend in anger...

My friends won't trust me anymore

If I talk to my friend during math class instead of working and paying attention...

My teacher and classmates are going to get headaches and be annoyed

If I say mean things about my friends behind their backs...

I won't learn very much math and will probably get a bad grade

If I walk outside in the rain and forget my umbrella...

My friend won't want to be my friend anymore

If I stay up all night playing video games...

My stomach is going to hurt :(

If I eat an entire pint of ice cream in one sitting...

I'm going to be SUPER tired the next day
